All data is important, even if the numbers are small

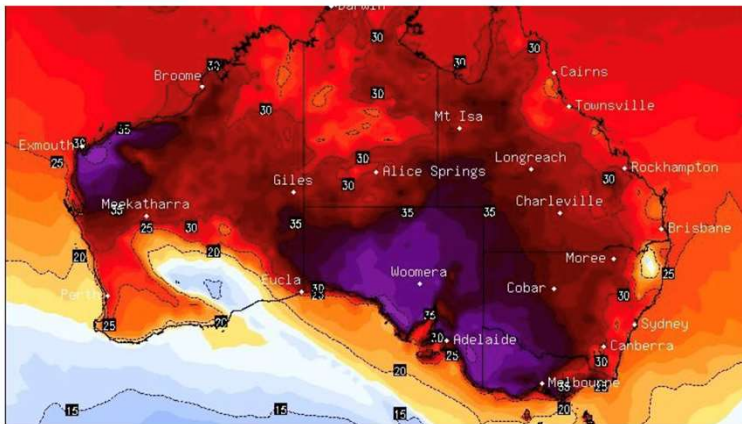

- The correlation between the heatwave and the surge in searches highlights the importance of real-time data analysis.
- Public services could use this data to prepare for increased demand, ensuring better resource allocation and customer satisfaction.

## Millions of Aussies impacted by severe heatwave sweeping multiple states

Millions of people are expected to swelter through 40 degree temperatures, as authorities warn of high fire danger in some communities.

7 min read March 10, 2024 - 8:40PM NCA NewsWire

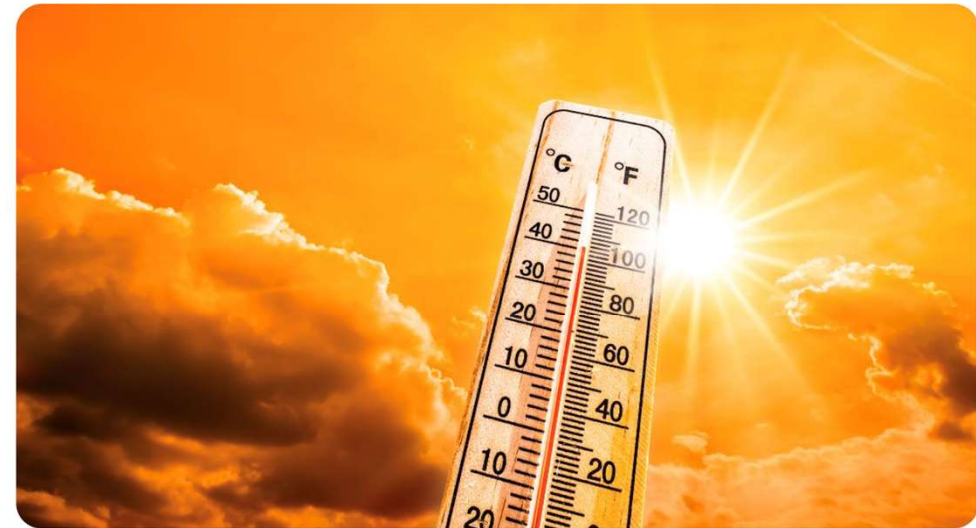

Southern Australia is experiencing a severe heatwave and fire danger conditions.

# South Australians urged to prepare for extreme heat

08 March 2024

A heatwave warning has been issued for South Australia this March long weekend, prompting calls for South Australians to take measures to keep themselves and their loved ones safe.

South Australians are being urged to prepare for a heatwave this March long weekend, with temperatures forecast to remain in the high 30C and 40C range in the Adelaide metropolitan area.

Provide us with your data, and  
we'll uncover the reasons

People need to understand the reasons behind the data.
